

SMART INDIA HACKATHON 2026

- **Problem Statement ID – SIH26204**
- **Problem Statement Title – Student Innovation-A solution/idea that can boost the current situation of the tourism industries including hotels, travel and others.**
- **Theme - Travel & Tourism**
- **PS Category - Software**
- **Team Name – FLUX1**

SafarSaarthi builds trust at the moment of an unbooked tourist interaction.

Verify | Pay Fair | Stay Safe | Create Proof

THE PROBLEM

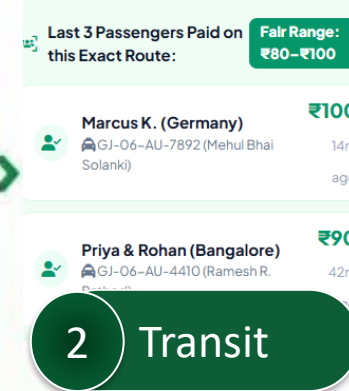

- Unknown People**
Who can I trust?
- Unfair Fares**
Am I overpaying?
- Scam Hotspots**
Is this area safe?
- Fake/Unverified Reviews**
Can I trust them?
- No Verifiable Proof**
What if something goes wrong?

CORE SOLUTION

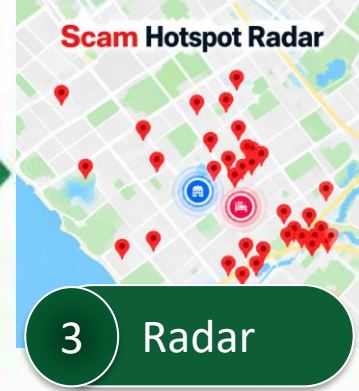

- Digital Handshake**
Scan, verify, connect.
- Route Fare Intelligence**
Fair, benchmarked, transparent.
- Scam Hotspot Radar**
Live geofencing & landmark alerts.
- Immutable Trip Ledger**
Tamper-proof verified records.
- Verified Reviews**
Real people. Real feedback.
- Incident Evidence**
GPS, time, photo, details.

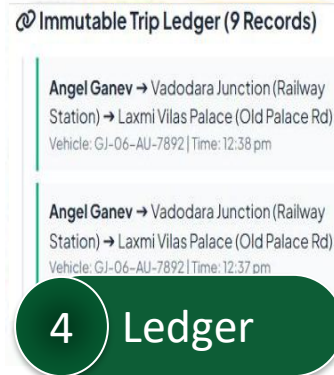

1 Verify

2 Transit

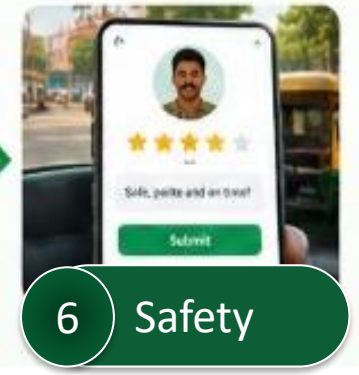

3 Radar

4 Ledger

5 SOS

6 Safety

INNOVATION
Why Verida?

15-sec Rotating QR
Prevents fake/replayed verification

GPS + Time + Credentials
Real-world proof

Two-Way Trust
Tourist ↔ Driver

Live Price Pulse
Real-time fare awareness

Verified Reviews
Linked to actual rides

Tech Stack

- HTML5
- CSS3
- JavaScript ES Modules
- Responsive/mobile-first UI

Core integrations

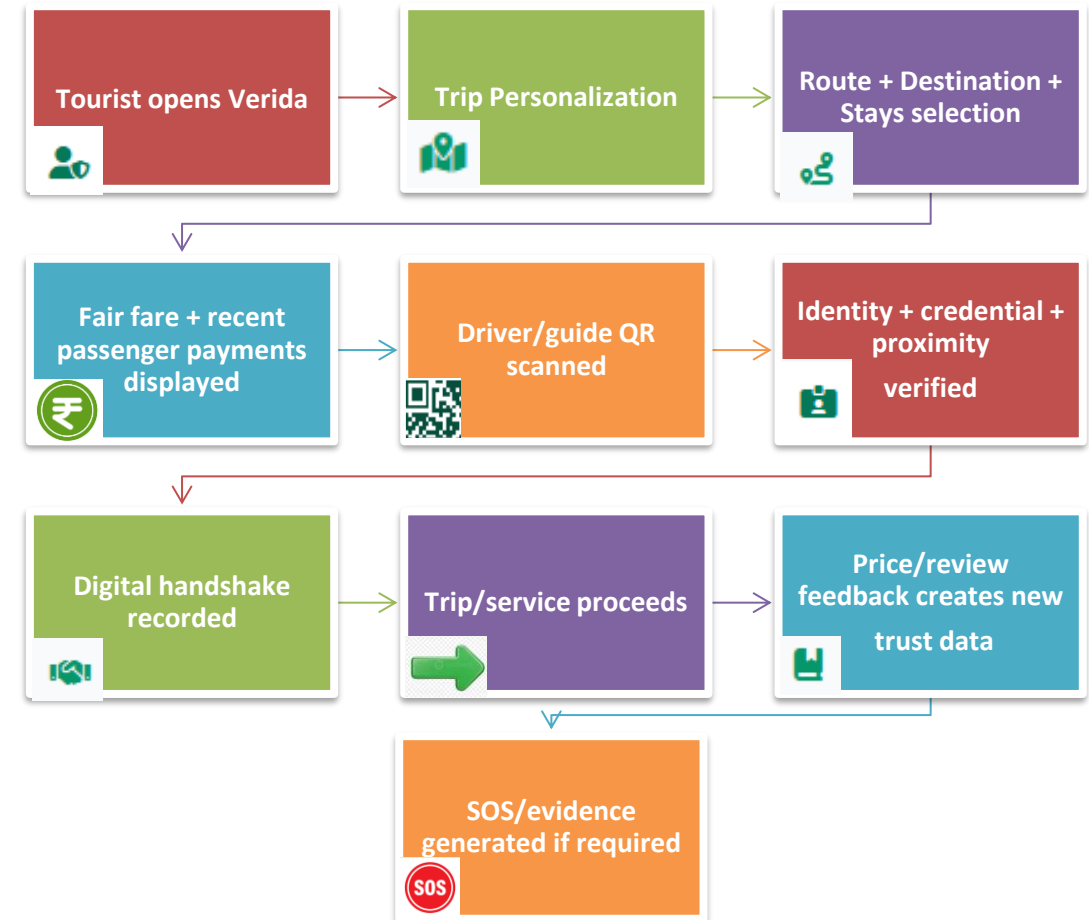

- Google Maps JavaScript API
- QRCode.js
- html5-qrcode
- Tesseract.js for OCR/price-document scanning
- Browser GPS/location capabilities

Backend / deployment

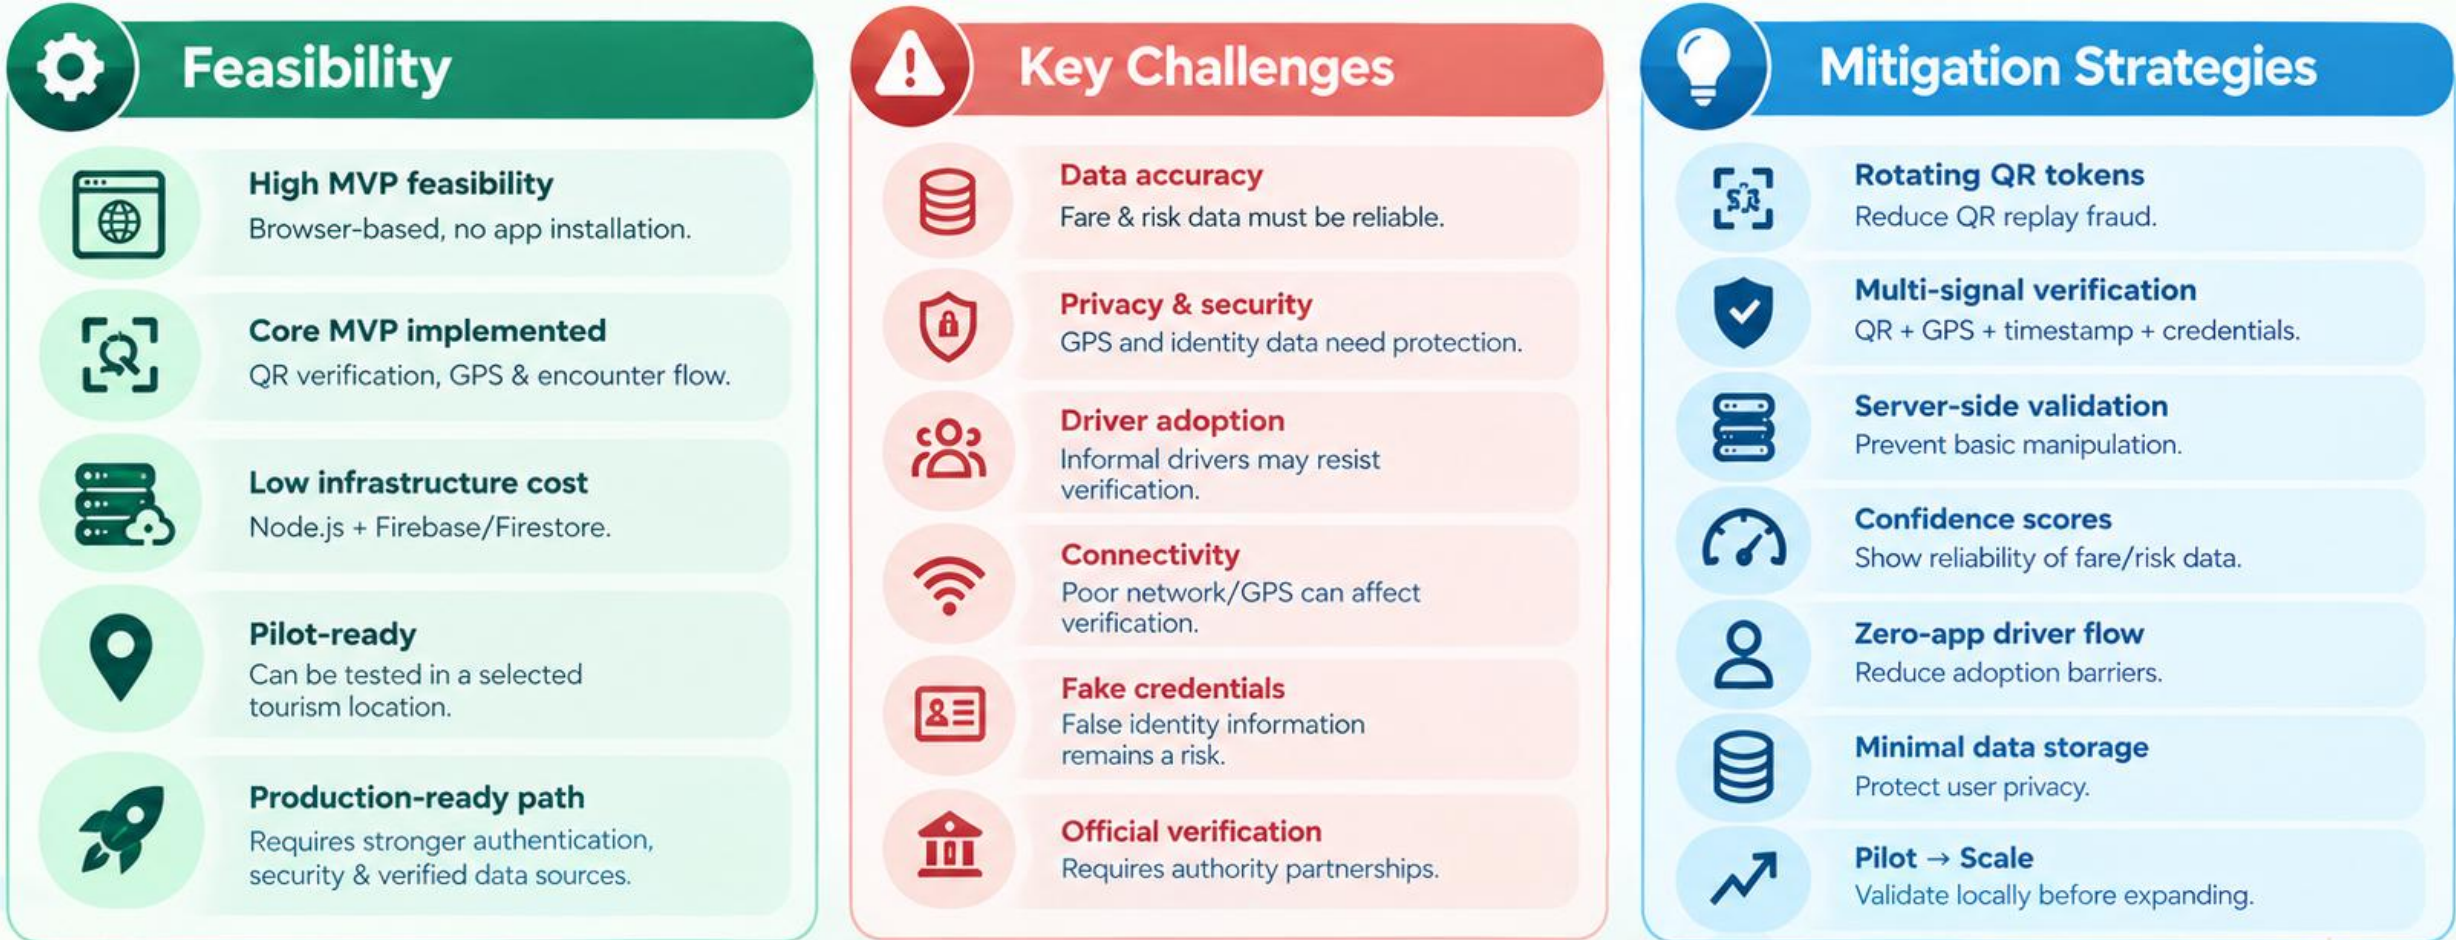

- Node.js
- Firebase Hosting
- Cloud Firestore + Firestore Security Rules
- LocalStorage for prototype profile persistence

Methodology and Process for Implementation

Links : [Github](#) | [Prototype](#) | [Report](#) | [Demo Video](#)

Highly feasible as an MVP, scalable deployment depends on **verified data**, **security hardening** and **local partnerships**.

Benefits of the solution

Social

Safer and more confident tourism;
stronger accountability

Tourism

Improves visitor experience and
destination trust

Digital

Creates a reusable trust/reputation
infrastructure

Economic

Reduces overcharging and supports
honest drivers/guides

Safety

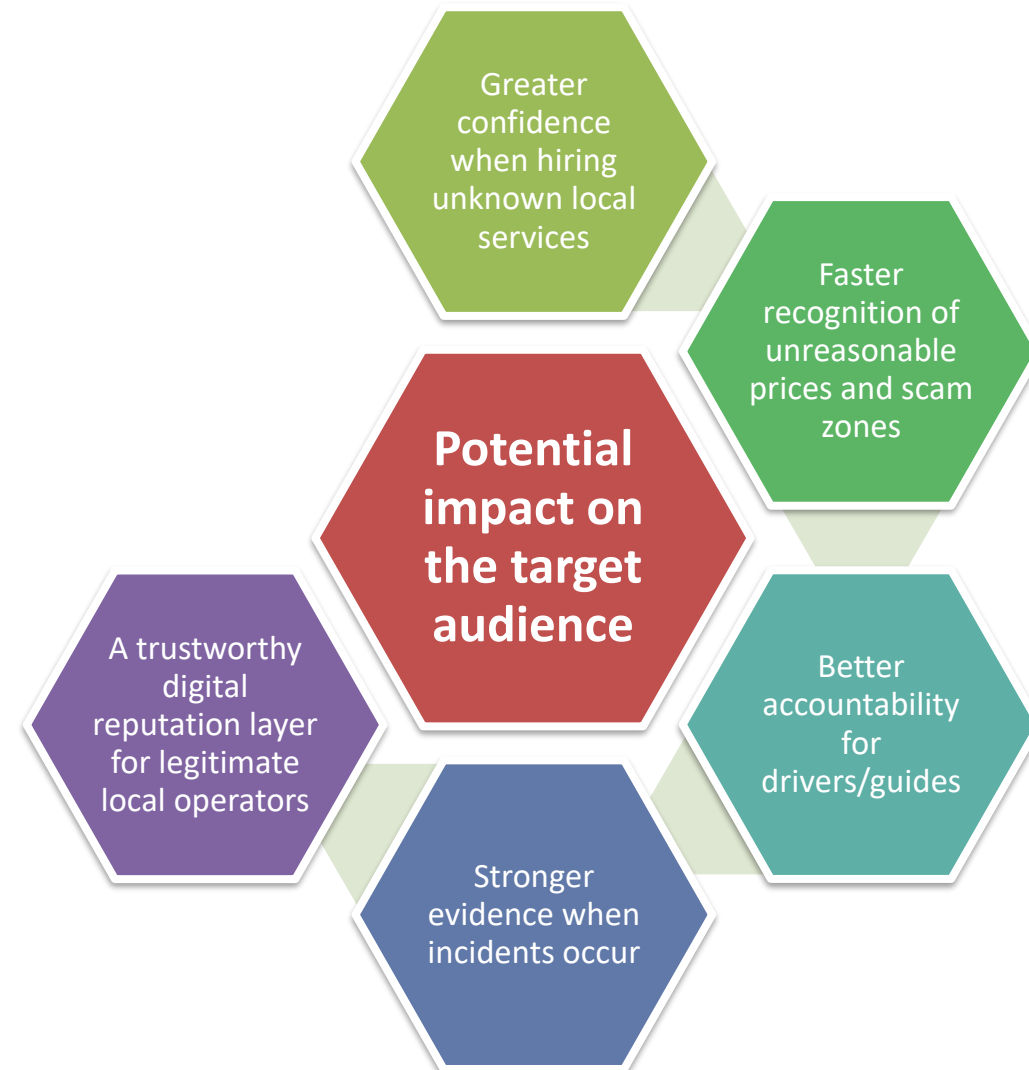

Faster verification, hotspot warnings
and emergency evidence

Environmental

Primarily indirect; digital records
reduce reliance on paper-based
incident/reputation documentation
